

Revolutionary New Way To Buy Hosting

LowPriceHosting.net launches revolutionary new way to buy hosting. The established method of buying hosting is using fixed, inflexible plans at set prices for set features. At LowPriceHosting.net you buy plans by the dollar. One dollar buys you a certain amount of disk space and monthly download bandwidth and now all the customer needs to do is decide how much they want.

Canada (FPRC) Oct 13, 2005 -- Today LowPriceHosting.net launches a revolution new way to pay for hosting. In the old days you had to choose which fixed plan you wanted and in the old days what you really wanted was always between one plan and another.

LowPriceHosting.net is the new way... \$1 buys you 250Mb of disk space and 1Gb of bandwidth now all you have to do is say how much you want. So if you spend \$3 you get 750Mb of disk space and 3 Gb of monthly download traffic. \$10 gives 2.5 Gb of disk space and 10 Gb of monthly download traffic and so on...

"I started this company when I couldn't find the hosting deal I wanted" said Gary Sims, founder of LowPriceHosting.net. "Now with LowPriceHosting.net the customer gets what they pay for rather than having to pay for what they don't want."
