

Labelmate Label Rewinders Now Available At AdaZon Inc.

AdaZon now has Labelmate label rewinders to complement the custom labels sold and the extensive thermal transfer and direct thermal labels supplied to customers.

FOR IMMEDIATE RELEASE

1/19/2006

Labelmate Label Rewinders Now Available At AdaZon Inc.

AdaZon now has Labelmate label rewinders to complement the custom labels sold and the extensive thermal transfer and direct thermal labels supplied to customers. These label rewinders make label printing neat and easy in the shop.

Chicago, IL - January 18, 2006 - Why Labelmate label rewinders? Label rewinders can be in very heavy duty environments and under continuous operation. Labelmate label rewinders provide the industrial strength and heavy duty parts to last a life time. AdaZon selects only the best product to provide to the customer and that is why Labelmate was selected as the label rewinder of choice for our customers.

Many distributors and manufacturers print labels for product control, stocking and shipping. The label rewinder allows the labels to be printed in batches, rolled on cores and then dispersed among others for the labeling of product. By selecting a label rewinder at <http://www.adazonusa.com/labelrewinders-c-55.html> the customer can select the proper size for the application at hand.

Continuous operation is common for these rewinders. With the Labelmate rewinder, continuous tension can be on the label allowing the printer to stop and start without adjusting the rewinder. As the printer stops, the rewinder stops. There is also an adjustable torque to allow the rewinder to become a label slitter.

What type of label rewinders are available?

1. The Heavy Duty Cat-2 label rewinder - designed for continuous duty operation in rugged environments.
2. The MINI-CAT-10 - low cost rewinder for everyday use and can be positioned at any angle.
3. The MINI-CAT-11 - low cost with adjustable core diameter from 1-inch to 4-inches.

At http://www.adazonusa.com/production/adazon_barcode_labels.htm find information on bar code labels that can be used on these rewinders. More information can be found at: <http://www.adazonusa.com> or by calling 847-235-2700.
