

Innovative Photographic Picture Pairs game is a real memory jogger

FotoInsight Presents its Unique Picture Pairs Game – and path to success right at the start of the new school year.

September 14, 2006 (FPRC) -- At last FotoInsight's quality is available in a new group of games designed for the younger set. The online digital photo printing specialist is launching a "Photographic Picture Pairs" game printed from the customer's photographs. All that is required are 25 digital images (576 x 432 dpi) to make this traditional and original, specially created game.

Any family that has digital photos can create this unique memory jogger. A durable print on quality cards makes the special view from holidays, family photos and the memories of childhood unforgettable. FotoInsight Ltd. Managing Director Klaas Brumann comments: "FotoInsight's Photographic Picture Pairs are a new dimension in combining own digital images and the ability to create classic games."

New FotoInsight Picture Pairs game

Match the photos to make-up your pairs. The game promotes the mental development, sorting, mental image rotation, matching and the development of memory skills. Encoding, of novel picture pairs activates the perirhinal cortex (a region of the brain) and is a real memory jogger for all ages. Creating a personal FotoInsight Picture Pairs game from digital camera images is as easy as ordering any other photo prints online. Once the user has arrived at FotoInsight's online Photo Gift section and has clicked on Print Items, a window appears displaying a range of photo calendars and Picture Pairs Game. The user uploads pictures in JPEG, JPEG-2000, PNG, TIFF, PSD, BMP and GIF through browser boxes or simply uploads a complete, compressed ZIP or RAR folder. An individual FotoInsight Picture Pairs game costs £9.99 plus £2.99 delivery at <http://fotoinsight.co.uk/gifts> (or €13.99 plus €4.99 delivery from <http://fotoinsight.com/gifts>) within the UK, to Ireland and most European countries.

Why is FotoInsight Picture Pairs such a valuable game?

Creating individual picture pair games from digital images offers much room for creative ideas with holiday snaps, flowers, landscapes and family pictures. A very unique Photographic Picture Pairs game can also be created from 25 familiar faces, like parents, children, grand parents, cousins and friends. According to researchers at the MIT Williams (Williams, A.O., 2001) there is behavioural evidence from infant experiments and studies of prosopagnosics (or face blindness, affecting about 1 in 50 people) providing evidence for innateness of special human face recognition abilities. There seems to exist an anatomically distinct area for quick, holistic recognition of faces. Some scientists suggest that faces might be processed differently than other objects with special difficulties in inverting face images, making a Photographic Picture Pairs game of familiar faces an extremely valuable and unique learning tool.

Convenience and flexibility

FotoInsight offers a PC and Mac compatible, independent online photo service, fully flexible to be used with images from any digital camera. According to FotoInsight's management the online service offers an extensive array of award-winning photo printing and photographic gift items and photo books, photo posters, photographic calendars, photo on canvas print, for the consumer,

business, photography, and graphic arts markets. From Cambridge, Mr Brumann comments: "Photographic memories must never fade. Our technology is smarter, providing long lasting prints in superior quality."

Information about FotoInsight Ltd

FotoInsight Ltd of Cambridge runs a custom made and easy to use print processing service. Customers benefit from patented development processes and the experience of Europe's largest independent photo lab with an installed capacity of 18 million prints per day. Photos ordered through FotoInsight are developed in one of 20 strategically located, state of the art photo labs, employing 3200 staff, with an output of over 3 billion prints per year.
