

Illustrated Casino Dictionary Now Offered

Money-Casino.com releases the very first online illustrated casino dictionary

November 15, 2006 (FPRC) -- The ever-innovative Money Casino (<http://www.Money-Casino.com>) presents the very first online illustrated casino dictionary covering over 150 key terms accompanied by screenshots with relevant highlights. Corresponding to Money Casino's game suite, visitors can find referents from all the featured table games, slots, and video poker games, as well as general betting terms, and poker hand ranks. Every term also links to a related game guide, with further details and game rules. This new gaming dictionary marks another advancement towards Money Casino's goal: becoming the most informative and player-friendly casino online.

Written and edited with new users in mind, the dictionary particularly aims to educate novice online players and people who are completely new to the world of gambling. Thanks to articulate explanations, clear graphic presentation, and convenient linking method, the user is provided with a comprehensive coverage of the fundamentals of a wide variety of casino games. In addition to straightforwardly illuminating the meaning of common and less common words used in the casino games, the purpose of Money Casino's illustrated dictionary of gambling is also to familiarize players with game tables and controls in their online version, and help them feel right at home within the casino software's user interface. As a result, the players can understand intuitively and practically instantly how each term is translated to actual game play, to ensure the smoothest and simplest experience. A similar illustrated poker dictionary will be added to Money Casino's sister site PokerEon.com shortly.

Experienced players are also welcome to celebrate the launch of this first-of-its-kind initiative in a time-limited promotion: Money-Casino.com invites players to send in suggestions for terms that can be added to the dictionary. Registered users who suggest a new term relevant to Money Casino's featured games with a matching screenshot from the software or the site will each get \$10 cash deposit to their personal account that can be immediately used for play. Players can simply send up to two suggested new terms and their username to support@money-casino.com, and if it fits they will be notified of their cash money bonus within five days. More information on this time-limited promotion can be found on the site.

With many to follow, the dictionary is the latest, but not last, application of Money Casino's groundbreaking approach towards usability, customer service, and player conversion, which sets it apart and above, and which guarantees superior game experience to players and successful and beneficial partnership to affiliates.
