

## **Phones Review Gets A Totally New Look On Site**

*Phones Review was built back in January 2006 and needed a complete change ready for 2007 and this site has had a makeover revamp that says it all.*

January 12, 2007 (FPRC) --

Phones Review has been around since 11th January 2006 which is not long at all when you think about it but it has got itself a good name with thousands of hits a day meaning that readers love the site and of which is growing fast.

This is why changes needed to be made to make this site more user friendly and more appealing to the eye and functionality of Phones Review really needed to be easier. Mobile phones and all other phone devices are becoming more and more advanced nowadays and so should the site that is reviewing the phones & accessories and this is why a complete new re-design needed to come in to the equation.

Phones Review were site of the day on askmen.com back in february 2006 and was given a rating of 9 out of 10 by askmen.com

Phones Review is all about getting across information clearly to the readers all about each product, news and debates in as much detail as possible but not too much to bore the reader who is interested. I have included in the revamp a community where they can chat with other members of the community of their interests and of which if they have queries they can find out from people direct with the same issues plus there is the addition of where readers can comment on each post and by using a function called Ajax they can view the comment with a single click this enables them to eith show or hide the comments.

Phones Review will continue to be updated daily with regular re-vamps and new ideas to keep everybody happy the world moves around and so will PR.
