

## Get More Miles with the Lexus 2007 Hybrid LS 600h

*We all know how great the previous Lexus Hybrid LS 600h was so now there is a new 2007 model out that is even greater than the first one, we know it was tough to beat but the people at Lexus has done a fantastic job*

January 23, 2007 (FPRC) -- The all new 2007 Lexus LS600h and the h being hybrid for those who do not know, the L model is the 4th in the Lexus hybrid series and this L series is the only one that you can pair with the the companies electric drive system of which has the ready for it V8 engine and of which the engine is a 5 Litre and this engine will push out 430 BHP (brake horse power).

The LS600h L is the most expensive of the series and will be available in the United States and is a long wheel base version, the car will seat four people and must say that the interior is very comfortable and luxurious, this Lexus hybrid car comes with LED lights and XM satellite radio which they say sounds fantastic and this radio offers real time traffic information.

You will not get lost when driving because it has fitted a navigation system, it get's better because when you want to park the car (parallel parking) all you need to do is push a single button and the car backs into the parking space itself but this is fitted by option, the Lexus LS600h has an amazing pre-collision setup system which uses cameras that scan the road and also trains the driver which is great if your a bad driver.

The list goes on what this hybrid car can do - So not only are you getting a car that has style and superb interior but you also get a car that is great for the environment. The Lexus Hybrid LS 600h will be available around about April 2007.
