

## Get Rid of Birds!

*Rid Pest Birds for good off of ledges, sills, rooflines, signs and more with Stainless SPIKES Needle Strips, an affordable and effective solution to protect your property from pest birds.*

February 20, 2007 (FPRC) -- Bird-X, Inc. Introduces Stainless SPIKES Needle Strips, which are heavy duty stainless steel prongs on a life-long polycarbonate base, combine affordability and effectiveness in controlling pest birds problems with a simple and permanent solution .

Stainless SPIKES Needle Strips eliminate roosting and nesting surfaces from any building or structure without harming birds, and comes in 4 1/2" and 2", 5" and 7" widths. It's easy to install, environmentally-friendly and practically invisible. Its flexibility allows hassle-free installation on straight-aways, curves, corners or irregular surfaces - even trees, arches and curved sign-letters.

Stainless SPIKES Needle Strips comes in two-foot pre-assembled sections to reduce installation labor and it carries a 10 year warranty. Each strip locks with the next for a seamless fit. Strips snap to the inch for precise measurement and no wasted material. Attach with adhesive, nails, screws or wire and requires no maintenance, resistant to virtually all weather and harsh environments.

Birds avoid alighting on the Spikes as humans avoid walking on a bed of nails - the SPIKES are not lethal, just extremely uncomfortable, sharply pointed barrier so birds can't land. No more droppings, mess, diseases or money wasted on expensive clean-ups.

Bird-X, Inc. Is recognized as the leading manufacturer and original bird control "X-perts" since 1964, offers the world's most complete line of affordable bird deterrent products - an effective solution for ANY bird problem for repelling birds like pigeons, sparrows, starlings, Canada geese and more.

Bird-X, Inc. Products are national and internationally distributed across the world to Pest Control Operators, Property & Facilities Managers, Maintenance Professionals and Home Owners.
