

Spring Decorating Trends to Beat the Winter Blues

Leading online retailer ShopTableLamps.com announces easy decorating tips and trends for the coming spring season.

March 7, 2007 (FPRC) -- Winter weather is still a force in many parts of the country, but spring, and spring decorating isn't far off. With many homeowners looking to brighten their home with the latest decorating colors and beat the winter blues, www.ShopTableLamps.com, a leading online retailer of decorative table lamp and desk lamp lighting, offers these handy tips for giving rooms a spring clean decorating makeover.

- * Color is a given for all spring decorating, but even more so this year, as a bright palate of lilac, raspberry, orange and golden yellow dominates. Consumers should look for contemporary table lamps with shades or lamps bases in these in-style colors and tones to brighten their rooms.
- * Traditional Tiffany style lighting remains as popular as ever. New, bold designs feature Tiffany art shades in vibrant purple and green colors that bring a fresh look to the traditional Tiffany, Mission and Arts and Crafts look.
- * With designers using more earth tones on the walls and ceilings, they are using colorful lamp bases and shades as a color anchor in room designs. Especially popular this year are ceramic lamps in bright colors.
- * Earthy wood tones are also popular in lighting designs. Wood pole table lamps with a hint of the tropical help coordinate with bamboo flooring, rattan furniture and other wood-tone home décor items.
- * If color isn't your thing, new glass body table lamps and monochromatic black and white base designs offer soothing treats for the eye. These lamp designs mesh well with the suddenly popular Hollywood décor style, as well as look great in more contemporary settings.
- * Function is what it's about in desk lamp lighting, but don't overlook the opportunity to add color to your home office or work space as well. New contemporary desk lamps come in a rainbow of colors, from vivid greens to cool blues, to help bring a little color therapy to the desk.

About ShopTableLamps.com
