There's a new home based business called Global Abundance Program. They donate a percentage of their profits to fight world hunger. Owners of the Global Abundance Program start earning money on their very first sale, unlike some 1-up and 2-up programs.

March 8, 2007 (FPRC) -- There's a new home based business called Global Abundance Program. They donate a percentage of their profits to fight world hunger.

Owners of the Global Abundance Program start earning money on their very first sale, unlike some 1-up and 2-up programs. There are several price points to get started which will enable almost anyone to get started at an investment amount that they are comfortable with.

One of the exciting parts of the program seems to be that owners, as they join, make money from their very first sale. Many 1-up and 2-up programs make you pass up your first and second sale to your sponsor which means that you don't make money (or receive a new "payline" until your third sale). This seems to be the new exciting buzz in the home based business world.

The system is called a modified 1-up compensation plan and has a lot of top earners in the business talking. You can find more information here: <http://www.retirewealthyinfo.com>

As always, doing your own due diligence is suggested before getting started in any program.

Many people that have been interested in the Global Abundance Program may have also looked at or been interested in Predator Marketing System, Emerald Passport, One Step, Coastal Vacations, Melaleuca, Passport To Wealth, Prosperity International, and other home based businesses.

Good Luck in your quest for more information on how to spend more time doing what you want to do and earning more while doing it.
