

## **Free Service from Northumbria Numbers.**

*Free transfer service with each personalised number plate bought from Northumbria Numbers.*

March 26, 2007 (FPRC) -- Northumbria Numbers have invested in a new transfer administration system to handle personalised number plate transfers and can now offer a free transfer service for each registration number purchased from them. The system has been custom written and uses database software for easy retrieval of the information required during the transfer of registration numbers on and off cars and motorcycles. It was originally conceived to improve efficiency, but it was quickly realised that it was the customers who could benefit most from this new software.

Unlike many other dealers who send out the certificate for the registration number to the customer leaving them to struggle with the paperwork and forcing them to make a special trip to their nearest DVLA local office ( which are only open MON-FRI , office hours) in order to assign their newly purchased registration, Northumbria Numbers send the customer a stamped addressed envelope and a letter which lists the documents to put in the envelope. The purchaser then puts the S.A.E. in the post box and Northumbria Numbers assigns the registration number to the vehicle and forwards the amended documentation and tax disc to the customer. They can even supply appropriate acrylic plates ( at extra cost ) if the customer provides proof of I.D. when he send in his documents ( old utility bill or similar ).

This is a deluxe service for Northumbria Numbers customers at no additional cost , further adding to the range of helpful services already in place.
