

Direct from Rodeo Drive: The Plastic Surgery Calendar

A Beverly Hills plastic surgery center has released a plastic surgery calendar so people can plan their procedures in time for important life events.

June 16, 2007 (FPRC) -- Rodeo Drive Plastic Surgery, the first and only plastic surgery center on the glamorous and stylish street, has released a plastic surgery calendar. Rodeo Drive Plastic Surgery's medical director, California cosmetic surgeon Dr. Lloyd Krieger, notes that this plastic surgery calendar can help people plan their cosmetic surgery so their recovery is complete and results are apparent before their important life events.

Six weeks recovery:

Rodeo Drive Mommy Makeover. For moms looking to get their shape back, Dr. Krieger performs his sought-after combination procedure for moms – including a tummy tuck to flatten the midsection, a breast lift or small implants to make the chest perky again, and sometimes liposuction of the thighs. What makes the procedure unique is that the bottom of the newly created belly button is stitched more tightly to the deeper tissue to highlight a natural effect. The result has become known as The Rodeo Drive Belly Button.

Four weeks recovery:

Breast augmentation California and liposuction. To provide curves for those strapless dresses and wedding gowns, Dr. Krieger provides breast augmentation. And to slim the thighs for women and love handles for men, he does liposuction to make bodies perfect for any style.

Three weeks recovery:

Rodeo Drive Chin Rejuvenation. To erase even a hint of a double chin, Dr. Krieger does a specialized minimally invasive liposuction to smooth and contour the chin and neckline.

Two weeks recovery:

Chemical Peel. To even skin tone and smooth fine lines and sun damage, Dr. Krieger does a deep chemical peel.

One week recovery:

Botox. Botox often erases lines in the forehead and around the eyes completely, but takes a week for full effect.

Two days recovery:

Skin and lip fillers. To fill in deeper lines, such as between the nose and mouth (“the nasolabial folds”), or to give a hint of the Angelina Jolie pout to the lips, Dr. Krieger uses Juvederm or Restylane.

Summer break can also be a convenient time for students and young adults to schedule procedures, such as rhinoplasty.

Rodeo Drive Plastic Surgery: Nestled next to Chanel, Dior and Tiffany & Co., Rodeo Drive Plastic Surgery is the only plastic surgery center on Rodeo Drive. The posh 5,000 square foot facility looks more like a boutique than a doctor's office.

Rodeo Drive Plastic Surgery is accredited by AAAHC and Medicare and the full-sized operating rooms and recovery suites are equipped with the latest equipment and fully staffed at all times to provide the best patient care possible. “We designed our center to combine the convenience of storefront shopping with what I call the Four Seasons treatment.,” Dr. Krieger concludes. “Because cosmetic surgery is elective, people are looking for a first-class experience, and that’s what we offer at our center.”
