

## **Introducing TheBerryTree - The Only Patent Pending System In Network Marketing**

*The Berry Tree was developed by an established, debt free health company called Nutronix. The Nutronix founders recognized why many in network marketing were not succeeding so they developed a program to help people start their own business, without the need for sponsoring others. This new program will allow each member to remain as passive or as active as they want while still earning money.*

August 14, 2007 (FPRC) -- The Berry Tree was developed by an established, debt free health company called Nutronix. The Nutronix founders recognized why many in network marketing were not succeeding so they developed a program to help people start their own business, without the need for sponsoring others. This new program will allow each member to remain as passive or as active as they want while still earning money.

Nutronix is a seven year old health and wellness network marketing company working out of Mechanicsville, VA. They have an international team of distributors in more than 60 countries. They are currently implementing a new division, The Berry Tree. What is so unique about this new division is the planned multi-million dollar advertising campaign that will begin within the next couple of months, plus a unique compensation plan that literally guarantees success.

No other company would be so bold as to guarantee your success. The Berry Tree can make this claim because they will help their members build their home business by using a percentage of the monthly membership fee towards advertising that will actually bring in new members to be placed under current members. Another unique feature of the system offers commissions not only on the number of members under you, but also on a percentage of all active members in the company.

Nutronix International has filed a patent for this process that will change the way network marketing companies pay their members. Once the US Patent Office approves the patent the companies revenues will skyrocket due to the option of offering their system to other network marketing companies.

Startup cost – None, you pay for first month auto ship which is about \$55.95

Monthly cost required to be eligible for commissions – \$55.95

Reliability – Based on a debt free company that has been in business for over 7 years.

Unique – The Berry Tree is designed for two types of business owners - Active and Passive. You actually do not have to recruit to earn, but doing so will build your business faster. Part of your monthly payment goes towards advertising so the company advertises for you through the marketing power of Horizons Marketing Company.

O2 Berry Product - Every Sachet of O2 Berry contains calcium, magnesium, and over 70 trace minerals. These essential minerals (electrolytes) become ionic in water allowing them to be absorbed quickly and easily by your body. O2 Berry is delivered in a pure ionic form, which means it

is immediately bioavailable to the body.

TheBerryTree can not enroll new members from the following countries due to government regulations: China, Colombia, Denmark, Finland, Germany, Ghana, Hong Kong, Iceland, Indonesia, Italy, Nigeria, Norway, Pakistan, Romania, South Africa, Sweden, Yugoslavia, Zaire

This reporter has been a Berry Tree Distributor since April of 2007 and has a system of duplication in place that can help anyone succeed. He currently resides in Newark, Delaware.
