

Poker Added to Casino Magazine

Online magazine by Money-Casino.com launches new poker section and new features

August 22, 2007 (FPRC) --

Every player has two forces working in his or her core: the first is strategic planning; The second is a belief in chance and intuition. The online magazine of www.Money-Casino.com has added two new features that address these two aspects of our players: A new poker section with comprehensive tips and strategies, and a new and entertaining psychic ability test that trains the player to reveal the unknown.

Money Casino Magazine now features a whole new section exclusively dedicated to poker articles. The purpose of the new section is to address the needs of poker players who are looking for ways to step up their game and become better, smarter, and more profitable players. Being such a popular game with so many levels of play and strategy, poker definitely deserves its own section.

Featured articles include useful play advice such as tournament tips, how to calculate pot odds, and beginner mistakes to avoid. The poker section also includes more basic guides, suitable for players making their first steps in this world. The poker guides include an introduction to Texas Hold'em poker tournaments, as well as to other poker versions such as 3 Card.

Joining the magazine's Fortune Teller, the new psychic ability test is a fun feature that speaks to the adventurous side of the players. The test, called "Predict the Future" analyzes the players' ability to predict events that hadn't happened yet (for example, where the roulette ball will land at the end of a spin), or to reveal something that happened out of the players' sight (for example, which cards were dealt to other players).

The new feature tests the players' intuition by analyzing their performance in a series of rounds. Players are encouraged to take the test again, to see if they can improve the ability to predict the operation of the program - an ability that is very useful when it comes to casino programs...

The new features were added to the magazine alongside the regular sections that include casino articles, casino strategies, casino humor, and the Fortune Teller. New interesting and entertaining articles, featuring valuable information, are added at least twice a week. Readers are welcome to visit frequently or subscribe to the RSS feed when visiting the magazine.
