

iPhone Bling the next Big Thing?

AllAmericanBling.com announces a new section of their web site devoted exclusively to iPhone Bling.

August 30, 2007 (FPRC) -- "Nothing defines bling more precisely than the Apple iPhone." says the headline on AllAmericanBling.com's new iPhone page.

So it is only natural that web sites like AllAmericanBling.com are now offering iPhone bling. "We have what the market place demands," said Jeff Young, spokesman for www.AllAmericanBling.com. "We have a very large selection, and highly competitive pricing when it comes to iPhone accessories. This is a natural for our web site." Young said.

"AllAmericanBling.com is one of the top ranked sites in Razr Phone bling," Young said, "So iPhone bling comes to us as naturally as a Betty Boop cell phone faceplate cover. Our site is all about the latest in conspicuous consumption technology. The hottest 'I want it, I want it' technology right now is the iPhone. We have all the technology to support the phone with, and all the gear to 'bling out your phone.'" said Young.

"Just as we are known for Razr Phone faceplate covers, we are now becoming known for iPhone covers, cases, pouches, bags, pocketbooks, and holders. We have Bluetooth headsets made for the iPhone, iPhone books and manuals, cables, connectors, car chargers, and home chargers, just to name some of the gear." Young said.

"The industry was a little slow to respond in bringing out accessories for the iPhone, due to Apples secretiveness in developing this device, but manufacturers are bringing out new products steadily now, and AllAmericanBling.com is right on top of the latest as they come out. They are often featured as our 'Bling of the Day.'" Young said.

"We have made it easy for consumers to find iPhone gear on our site by placing links on our homepage that connect directly to the products that support the iPhone. A consumer can find our new 'iPhone Bling' page at www.allamericanbling.com/iPhoneBling.shtml." Young said.

AllAmericanBling.com is the new shopping and gift site from Vista Virtual, LLC. The website keeps consumers up with the hottest "bling" including Razr Phones, iPods, jewelry, the latest clothing, and toys.
