

Volunteer Abroad - Explore New Options With Volunteering Solutions

The ever expanding demand for quality volunteer abroad opportunities has given birth to a highly professional yet affordable volunteering organisation called Volunteering Solutions

Delhi, India, August 31, 2007 (FPRC) -- Volunteering Solutions prime area of providing volunteering programs is in Asia and Africa where help is greatly needed. An estimate of over 100000 volunteers volunteer abroad every year and the numbers are growing every day.

They are not the usual run of the mill organization providing the same services, they work with locals and are based locally, and unlike companies who are based in US or UK we are based in India. This helps them reduce their costs and provide better first hand services to their volunteers. They provide exciting volunteer abroad programs in India, Nepal, Sri Lanka, Vietnam , Kenya, Cambodia and Thailand. The programs run throughout the year in most countries enabling volunteers to join at the time they like. The programs run from 2 to 26 weeks for people to join for the duration they wish.

Volunteering Solutions Mission - Our mission is to promote volunteer work in countries that need it the most, by connecting the right people with the right opportunity in each country. We aim provide meaningful, affordable & reliable volunteer abroad options to everyone.

They provide their volunteer's true realistic picture of the program and the area they are going to work in. Their volunteers also enjoy their exclusive combined Volunteer & Travel packages in India and Nepal. "More than 75 volunteers have joined us in the past 3 months of our site launch" says Anurag V, Program Manager for Volunteering Solutions.
