

Maternity Scrubs Updated for Today's Fashions

Sassy Scrubs Redesigns Maternity Scrubs Emphasizing Comfort And Fashion

September 28, 2007 (FPRC) -- Since today's body skimming Maternity Fashions are not welcome when worn by staff in most professional health offices and health care facilities, style-conscious expectant nurses have been faced with a huge work wardrobe dilemma. What to wear!

To help eliminate this worrying problem, Sassy Scrubs has re-designed Maternity style Tops in its nursing scrubs, medical scrubs, dental scrubs, and veterinary scrubs lines. The company combined last decade's flowing, comfortable, bell shaped Maternity Tops with current close-to-the body fashions, to unveil a true, new classic in maternity scrubs. Their Maternity Styles are comfortable and highly fashionable, yet demure and sophisticated. Expectant nurses appreciate the ability to order custom made Maternity Tops with an optional tie-back option, to bring the garment closer to the body, creating the marriage of comfort and fashion in maternity scrub wear. Most importantly, the new Maternity Tops are welcome in, and approved by, hospitals, long term care centers, and physicians' offices across the globe. Facilities involved in medical care, dental care and veterinary care have applauded this forward thinking approach, which offers their respected staff "grown up" options for work wear.

This updated and re-vamped Maternity Scrub Top offers choices for after work wear also for comfortable, fashionable alternatives for a day of shopping, a visit to the library, or a relaxing dinner at the local pizza parlor when those cravings get the best of you. Sassy Scrubs, an online manufacturer of custom made scrub uniforms, also vows to offer the most choices for nurses throughout their pregnancy since they offer Maternity Scrub Tops in an amazing choice of over 1,400 fabrics, most of them soft, cozy 100% cotton. So when an expecting mom needs to pamper herself, and relax, she can thank Sassy Scrubs, knowing she's found the last style of Maternity scrub wear she'll need for work and home.

Begun in Upstate New York, Sassy Scrubs is still located in a small rural town. Each piece ordered is carefully cut and sewn individually so the seamstress "owns" each garment they produce. The seamstresses care about their workmanship and their quality shows in each piece produced. Good quality, well made, and one piece at a time.

Sassy Scrubs was the first company to offer print designs in scrub wear and the first to offer cotton as a fabric choice. The company also saw the need for a broader size base, offering sizes from XXS to 6XL. Customers needed more choices for size, variety, and length of garments. Sassy Scrubs recognized that need for choices, and they delivered.
