

New Site Simplifies the Movie Downloading Process

Users Gain Access to Comprehensive Comparisons and Easy-to-Use Database of Movie Downloading Sites

October 4, 2007 (FPRC) -- If you have ever spent any time online trying to find the right movie downloading site to view your favorite flick, then you know how many there are to choose from. So how can you be sure you're using the right movie downloading site? With so many out there, how do you know that you are getting the right price, the right product, and the right movie downloads package to suit your needs? In the past, you would literally have to explore each independently and come to a decision based on your research. That was then, and this is now. Moviesanddownloads.com is meeting the needs of the movie downloading public by providing a forum whereby users can search, research and compare sites, all in one place, side-by-side.

Moviesanddownloads.com has rocked the movie downloading industry by taking the seemingly daunting task of sorting through the multitude of site options by providing Web users with an at-a-glance view of the top sites. Moviesanddownloads.com has some of the best impartial site reviewers in the industry out there, every day, searching for the best movie downloading sites. Following a list of criteria that each site must meet in order to qualify as a featured movie downloading site, these reviewers determine the best of the best, which they then list with details at moviesanddownloads.com.

The criteria that every site must meet in order to become a recommended movie downloading site include: offers quality movie downloading; options for music, games and television shows as well; an 8-week money back guarantee or a free trial; must be 100% legal; provides security options such as pop-up blockers, no spyware, and no adware; must be iPod and PSP compatible as well as offering compatibility with PC, AOL, Mac and Linux; and offers quality technical support.

Once our reviewers have determined that a site is of 'recommended' movie downloading quality to our users, then that site's address, a screenshot and a detailed summary is provided so that users can browse and conduct a comprehensive comparison of their own. Details of each movie downloading site includes: the type of security offered, whether free trials are included, the price, the terms of use, type of media used, the number of movies available, and much, much more. If and when the time comes that a user would like some guided support from one of our movie downloading experts, we have several contact options including a toll free number, email address, or a live chat forum with immediate response.

While moviesanddownloads.com takes extra precaution to help ensure that all our featured movie downloading sites are 100% legal, we also believe that it is a movie fan's right to choose the site that best fits his or her needs. Therefore, we feature both P2P and legal movie downloading sites.

With headquarters in Austin, Texas, Moviesanddownloads.com serves the World Wide Web 24/7/365 and offers ongoing platform and technical support to its users. Moviesanddownloads.com is a free service, providing impartial reviews of movie downloading sites to consumers. Reviews that are found on the site are based on findings revealed during research of the movie downloading site referenced and are subject to change without notice. Moviesanddownloads.com is a 'must see' and 'most recommended' movie downloading site in channels and forums. The movie downloading

industry is growing by leaps and bounds, and moviesanddownloads.com is right there to help users recognize the best value for their time and money.

When compared to rental fees, once you've downloaded 4 or 5 movies, a membership or fee has paid for itself. If you're buying movies, 1 movie download will cover that price. It's 100% secure, 100% legal and 100% guaranteed. You want quality movie downloads? Tired of slow downloads? Looking for the largest collection on the Internet? Just want a nice collection for the lowest price possible? Moviesanddownloads.com can meet your movie downloading needs.

Visit www.moviesanddownloads.com today to find out how we're changing the way Web users think about the movie downloading process to download movies.
