

Finding the Perfect DVD Ripper and DVD Copy software Just Got Easier

New Website Offers Users Simplified Way to Find and Compare DVD Ripper and DVD Copy software

October 8, 2007 (FPRC) -- DVD ripper and DVD copy software is a perfectly legal practice. But many would say that it is not. If you are unsure whether or not DVD ripper and DVD copy software is something which you should and are allowed to use, then a visit to DVDSHrinkNow.com will be an educational experience.

First, let's define what DVD ripper and DVD copy software actually is. Copying transfers the content from one DVD onto another or onto a drive. Rippers, on the other hand, are programs that allow users to transfer a DVD to an iPod, PSP, CD, etc., by converting the DVD format into many other various formats. Here is where the confusion for many begins though by the question...is this legal? The answer is: Yes. The warning that users see at the start of any recent DVD warns against copying, but these are not two in the same. That warning, as a matter of fact, is only warning against the practice of pirating, which is selling copies that are produced using DVD ripper and DVD copy software. To this end, companies are allowed to produce DVD ripper and DVD copy software as long as the DVD decryption (allows DVD ripper and DVD copy software to backup copyright-protected DVDs) is not built into the program. However, free DVD decryption can be downloaded and are legal, since they are packed into a DVD copy program.

It is with this knowledge in hand that DVDSHrinkNow.com makes the search for effective, efficient, legal, and quality DVD ripper and DVD copy software. This new and innovative site offers users unbiased and expert reviews of DVD ripper and DVD copy software.
