

David Pierce Launches His First in a Series of E-book Review Sites.

David Pierce launches his first in a series of E-book review sites. He is currently reviewing government grant E-books and websites. He is attempting to inform consumers of the good and bad when it comes to peddlers of e-books.

December 11, 2007 (FPRC) -- David Pierce of Huntington, WV just released a new website aimed at reviewing popular e-books aimed at getting government grants. The site is located at <http://www.grantwebsitereview.com> "With all the information out there about grants, it makes it difficult to sort through the good and bad", says David. There are many options available to the grant user and David tries to break it down for them.

David has been reading e-books for years, before they became popular. Becoming frustrated about the quality of the e-books, he decided to do something about it. This is where Grant Website Review was born. The grant writing process can be a time consuming and oftentimes difficult process, each e-book takes a different approach on what they show you. For example, some have a monthly newsletter, most do not. He shows you the strengths and weaknesses of each one in table format. Each of the e-books is reviewed in great detail. His favorites are organized in such a way that they a visitor can easily come back to the page they are interested in.

From educational to personal grants, David explains which websites are best for what you are trying to accomplish. The strengths and weaknesses are covered about each website. The website is geared for people who are interested in obtaining any kind of government grant.

The website reviews four of his favorite government grant e-books. He plans on adding more reviews in the future. The website is geared to the following people:

Those who are looking for government grant software and live help.
People who are interested in getting grants to buy foreclosures only to resell them.
Investors looking to land a grant to rehab their existing or rehab properties.
Students looking for educational grants and stipends, much help is available in this area.
Single mothers looking for help with living and educational expenses.

On his website visitors will find links to each e-book he reviews along with the details of each one. Each review contains a general description and what is covered in each e-book. He informs you of any software that comes with the e-book and whether or not there is a money back guarantee. "A money back guarantee was important in my decision on what e-books got reviewed" says David. Stating again that "A lot of E-books are junk, especially when it comes to government grant programs." You can find David's government grant review site at <http://www.grantwebsitereview.com>
