

Dental Implants Simplified: 1st-DentallImplants.com Matches Consumers to Implant Dentists

Consumer portal website 1st-DentallImplants.com provides local listings of dentists who offer implant dentistry, as well as a variety of other dental implant resources.

March 4, 2008 (FPRC) -- The Internet Dental Alliance announces the re-launch of its consumer information website 1st-DentallImplants.com (<http://www.1st-DentallImplants.com>). The website offers patients a variety of implant dentistry resources. Patients can find a properly trained implant dentist, learn more about dental implants, ask questions of an expert dentist, and more.

Users who want to replace missing teeth with titanium implants can quickly and easily find implant dentists in their area by entering their zip code. Whether they're general dentists or prosthodontists, the doctors featured are all trained in smile makeover techniques.

Every month the site features one dental implant dentist with remarkable expertise in the area of implant dentistry. Visitors to the site can email their questions directly to the featured dentist, who will post answers to selected questions. In addition, the archived posts of past expert dentists provide a valuable information resource for consumers who want to learn more about dental implant surgery.

Featured on 1st-DentallImplants.com are consumer information articles such as "Teeth Implants, Close Up and Natural - Is Implant Dentistry for You?" and "What is the Cost of Dental Implants?" In addition, the site offers clinical articles such as "Replace a Missing Tooth With a Tooth Implant " or "What's the Difference Between a Dental Bridge and a Dental Implant?"

The find-a-dentist website also offers up fascinating facts. For example, teeth implants that are over 1,000 years old have been found from the Mayan civilization. Tooth-shaped pieces of shell were found placed into the sockets of missing incisors and had actually been incorporated into the bone structure.

"Tooth implants just got a whole lot easier with this dental directory website!" exclaimed Jim Du Molin, owner of the dental practice website provider the Internet Dental Alliance. "It's a straightforward way to quickly find a qualified dentist near you. With dental implant technology, there's no longer any reason to suffer missing teeth!"

The implant dentistry portal <http://www.1st-DentallImplants.com> is one of the Internet Dental Alliance's many consumer information websites, recently launched in an updated and more comprehensive format.

The Internet Dental Alliance provides consumer sites in areas such as sedation dentistry, orthodontics, and cosmetic dentistry. All make patients' lives easier by offering zip code searches for specialized dental practitioners.
