

VLSystems Joins MultiFactor Corporation's SecureAuth™ Partner Program

SecureAuth™ Now Offered by VLSystems to Provide Customers with the Industry's Most Secure Identity and 2-factor authentication Solution on the Market

IRVINE, CA—March 14, 2008—VLSystems, a Microsoft Gold Certified partner and a Cisco Advanced Security Specialized partner, today announced the alignment with MultiFactor Corporation, an innovator in 2-factor authentication, web application security and SSL VPN Authentication solutions. As a MultiFactor Corporation SecureAuth™ Partner, VLSystems will now provide the tokenless, non-phishable, two-factor authentication and identity enforcement solution.

“Protecting our customer's private information is crucial,” says Tom White, chief executive office of VLSystems. “Partnering with MultiFactor will allow us to provide our customers with an innovative Two Factor Authentication solution to help secure their information in an easy to manage yet cost-effective manner.”

SecureAuth™ is a tokenless, non-phishable, 2-factor authentication and identity enforcement solution. Software-based, but stronger than hardware token, SecureAuth makes non-phishable web application security and SSL VPN Authentication easy to manage and cost-effective. The SecureAuth solutions validate both the client and server sides, utilizing an appliance or a Web plug-in and current data stores.

“As both a Microsoft and Cisco partner, VLSystems is a strategic partner for MultiFactor in assisting our customers to remain secure,” says Craig Lund, chief executive officer of MultiFactor. “VLSystems' focus on secure information solutions is the key to ensuring our customers achieve the maximum benefit of SecureAuth.”

About VLSystems, Inc.

VLSystems, founded in Irvine, Calif. in 1978, is a Cisco Advanced Security Specialized partner and a Microsoft Gold Certified partner specializing in secure information solutions involving Cisco LAN/WAN, data center and security, Microsoft advanced infrastructure, SharePoint Portal Server, workflow and collaboration, and managed services.

About MultiFactor Corporation

MultiFactor Corporation is pioneering the delivery of the strongest, proven 2 Factor Authentication, web application security and SSL VPN Authentication methodologies in an easy-to-deploy, low-maintenance product called SecureAuth™. This tokenless, browser-based authentication solution generates and validates client- and server- side certificates without PKI. SecureAuth represents the evolution of a technology that, for more than two decades, has remained the de facto standard for identity and access management technology. More secure than hardware or software tokens, SecureAuth is inexpensive to acquire, deploy and manage. MultiFactor Corporation's innovation and its development of real-world security solutions draws from a diversified team of cryptographers, network and Web application specialists and certified security engineers.
