

## **American Air & Water®, Inc. Awarded a GSA Federal Supply Schedule Contract**

*Hilton Head Island, SC - American Air & Water®, Inc. successfully met all the General Services Administration (GSA) requirements for being a government supplier and was awarded a Multiple Awards Schedule contract GS-07F-0256U on March 24, 2008. With the GSA contract American Air & Water®, Inc. will offer its proprietary germicidal ultraviolet light product – the American-Lights® UV Air Cleaner – directly to the federal purchasing agencies.*

April 4, 2008 (FPRC) -- American Air & Water®, Inc. successfully met all the General Services Administration (GSA) requirements for being a government supplier and was awarded a Multiple Awards Schedule contract GS-07F-0256U. With the GSA contract American Air & Water®, Inc. will offer its proprietary product – the American-Lights® UV Air Cleaner utilizes germicidal ultraviolet light technology – directly to the federal purchasing agencies. The American-Lights® UV Air Cleaners are proudly made in the USA.

American Air & Water®, Inc., a South Carolina Corporation, offers a complete line of residential, commercial and industrial UVC air, surface and water disinfection systems which greatly reduce or eliminate microbial contaminants in the air or water for any facility. The company has successfully provided products to various federal and local government agencies, such as The US Environmental Protection Agency Emergency Operations Center, The CDC and several military operations. The products have also been provided for The World Health Organization and several educational facilities, hospitals, clean rooms, laboratories and food processing plants.

American Air & Water's® commercial UVC coil cleaner is designed to meet The Facilities Standards for Public Buildings as designated by the U. S. General Services Administration Office of the Chief Architect specifying the HVAC standards and UV light requirements in all Public Buildings. In addition to the UVC products, American Air & Water® also offers a complete line of Sporidicin® decontamination and disinfection products.

The first step in being awarded the contract was to obtain a Past Performance Report from Open Ratings, A Dun and Bradstreet Company. After evaluating various key aspects like reliability, quality, accuracy and customer service from several of American Air & Water's® customers, the report showed that American Air & Water's® overall rating was at the highest level obtainable.

In addition, American Air & Water® provided documentation to prove that the American-Lights® UV Air Cleaner conforms to the safety standards for electrical products issued by UL Underwriters Laboratories®, Inc., a nationally recognized standards developing organization.

After all negotiations were completed, the GSA determined the prices offered to be fair and reasonable and the Multiple Awards Schedule contract was granted to American Air & Water®.

Warren Lynn, President of American Air & Water®, Inc. states “We are pleased to announce our GSA contract, number GS-07F-0256U, effective March 24th, 2008. We view this contract as a milestone for our company because it will simplify and streamline the process of offering our

products to the federal government. It will also provide a better opportunity of presenting and promoting our vision of providing a safer, healthier and more energy efficient environment."
