

## **Bodden Corporate and Knowledge Platform Partner in Delivering AML Training in the Cayman Islands**

*Bodden Corporate Services and Knowledge Platform have entered into a partnership to design and deliver a highly interactive e-learning solution for anti-money laundering compliance in the Cayman Islands.*

May 3, 2008 (FPRC) -- Grand Cayman and Singapore – Bodden Corporate Services and Knowledge Platform have entered into a partnership to design and deliver a highly interactive e-learning solution for anti-money laundering compliance in the Cayman Islands.

The solution, to be launched within May 2008, includes (a) four courses on anti-money laundering which address the training requirements of different levels of staff in banks and financial services and related services firms and (b) a hosted learning management system which enables clients to deliver courses, track performance and assess anti-money laundering awareness. The courses are built around Cayman Islands laws and regulations and international best practices in the field of anti-money laundering compliance.

In addition, Bodden provides training design and live training services and Knowledge Platform provides content development, customization and hosting services. In this way, clients have the option to utilize the standardized solution or create a customized version which addresses their particular organizational requirements. As such, the offering represents a 'single stop' solution for clients to quickly and effectively train their staff on anti-money laundering compliance in the Cayman Islands.

According to Mahboob Mahmood, the CEO of Knowledge Platform: "We are thrilled to partner with Bodden, which is the leading specialist compliance consulting firm in the Cayman Islands. We co-developed the courseware over a period of one year and it combines the best of Bodden's granular knowledge of AML regulations and challenges in the Cayman Islands and our international experience in designing and deploying anti-money laundering e-learning solutions. We believe that our solution is an excellent offering for any financial institution in the Cayman Islands. To date, our anti-money learning solutions have been licensed to over fifty financial institutions around the world and we look forward to extending our business to the vital financial centre of the Cayman Islands."
