The Berry Boost is an outstanding new product that is now being offered by The Berry Tree. It has a great berry flavor that comes in small packets much like Crystal Light. Imagine drinking eight salads in ten seconds. Now you can since this new product is packed full of vitamins, antioxidants and minerals.

May 21, 2008 (FPRC) -- The Berry Boost is an outstanding new product that is now being offered by The Berry Tree. It has a great berry flavor that comes in small packets much like Crystal Light. Imagine drinking eight salads in ten seconds. Now you can since this new product is packed full of vitamins, antioxidants and minerals.

Berry Boost is a nutrient-rich food supplement that surpasses the nutrition of five servings of fruits and vegetables without the calories or carbohydrates. Green food supplements, when properly formulated, are among the most nutrient-rich and beneficial foods on the planet. A quality green food supplement is a concentrated storehouse of minerals, vitamins, fiber, enzymes, carotenoids, and antioxidants that are stripped from every day food. This product has never had any heat added to it since heat eliminates mostly all the nutrients in vegetables.

Berry Boost is also rich in chlorophyll, which is often called "The Blood" of plants. Chlorophyll helps the blood cells deliver oxygen throughout the body. Berry Boost has four times the power of ordinary green food products. Many green food supplements are made only from dehydrated whole leaf powder but this product is made from juice powder and will emerge as the standard in green superfoods. These valuable nutrients are just a spoonful away.

One of the best ways to regain and maintain pH balance is to consume plenty of greens. Unfortunately, most of us are not able to sit down and eat enough green vegetables in order to experience the true health benefits of them. One of the most convenient and economical ways to solve this problem is to "drink your veggies" by making a healthy, alkalizing drink with The Berry Boost. Greens are some of the most alkalizing, nutrient-dense foods on earth. Green grasses infuse your body with easily absorbed vitamins, minerals, amino acids, fiber, chlorophyll, enzymes, phytonutrients, and alkaline minerals that help to neutralize acids in the blood and tissues.

With The Berry Boost from The Berry Tree, people now have a very easy way to get their vegetables in a great tasting drink.
