

DragonFire Racing Introduces Performance Parts for the Much Anticipated 2008 Yamaha Rhino 700 EFI Side-by-Side ATV

Custom Yamaha Performance Parts Now Available at DragonFireRacing.com

Mesa, AZ (FPRC) May 29, 2008 -- DragonFire Racing, a leader in custom performance racing vehicles, accessories and custom racing performance parts, today announced the availability of custom parts for the all new 2008 Yamaha Rhino 700 EFI.

Outdoor racing enthusiasts will find Yamaha Rhino performance parts such as the Rhino 700 EFI 7 Map Race Controller, Rhino 700 CDI, Yamaha 700 EFI DFR Clutch Kit, Rhino 700 Ignition among other top performance parts. The Rhino 700 EFI 7 Map Race Controller has 7 base map settings allowing the end user to run any pre-programmed settings as well as calibrate their own fuel and ignition map. The controller provides a 2000 RPM increase over the stock version allowing for greater speeds with a 4500 RM map for lower speeds and a 8500 map for overall top speed.

"We added our DragonFire Racing Snowmobile Clutch, Intake and Exhaust to the new Rhino 700 SxS and saw a low 70 MPH range. Enhancing the Rhino 700 with DragonFire's featured parts adds speed and overall performance unleashing all the horsepower available, making the Rhino 700 the fastest bolt-on Rhino possible," stated Todd Romano, spokesperson for DragonFire Racing.

The highly anticipated Rhino 700 EFI has garnered much attention since its release earlier this year. As a star in the SxS ATV vehicle market, the Rhino 700 EFI offers more power and fuel injection along with several new benefits for both the passenger and driver, including doors and additional passenger handholds.

DragonFire Racing is an industry leader in the performance racing field and a one stop shop for fabrication, paint, performance and protection for stock and custom ATV, Side-by-Side and other off road racing vehicles. In addition to the Yamaha Rhino parts, racers can find a wide selection of ATV exhausts and side-by-side parts, for all major brands including the Polaris Razer, Kawasaki Teryx, Arctic Cat Prowler and Honda Big Red parts.

With a 10,000 square foot corporate facility in Arizona as well a retail location in San Diego, CA, DragonFire Racing has grown to be a reliable and preferred solution for outdoor racing enthusiasts.
