

123Together.com Provides Immediate Support for the Apple iPhone 3G

Leading hosted Exchange provider, 123Together.com, enables users to dramatically increase corporate productivity with the new Microsoft Exchange ActiveSync-enabled iPhone 3G and 123Together.com's hosted Exchange Server

July 11, 2008 (FPRC) -- BURLINGTON, Massachusetts - 123Together.com - a mindSHIFT company and the leading provider of hosted enterprise-class messaging and collaboration solutions such as hosted Microsoft Exchange Server 2007 and Windows SharePoint Services 3.0 -- today announced its immediate support of hosted Exchange for Apple's new iPhone 3G.

With Apple's integration of Microsoft Exchange ActiveSync and its new iPhone 3G, 123Together.com hosted Exchange Server customers and iPhone users can now have anywhere, anytime access to their business email with two-way wireless synchronization. This enormously popular consumer smartphone can now be used by business owners, sales executives and other mobile employees as a leading business tool. Email, calendars and contacts are wirelessly "pushed" from 123Together.com's hosted Exchange Server to the users' iPhone, giving them immediate and secure access to workplace resources, increasing productivity and communication with their co-workers and customers. In addition, IT staff members can remotely "wipe" a user's device if lost or stolen so that the user's corporate and personal data cannot fall into the wrong hands.

Support for Apple's iPhone 3G is the latest addition to 123Together.com's Hosted Exchange Mobile Services offering which, along with ActiveSync, provides full synchronization support for mobile devices compatible with BlackBerry Enterprise Server and Good Messaging Server, enabling mobile users to take advantage of enterprise-class messaging and collaboration solutions such as hosted Exchange and hosted SharePoint.

"Mobile employees who currently use their iPhone to watch videos, take photos, listen to music and check stock prices can now also take advantage of the power of Microsoft Exchange Server as a hosted service to keep them connected with their office 24x7," said Ravi Agarwal, founder and senior executive officer of 123Together.com, a mindSHIFT company. "Our current 123Together.com hosted Exchange customers can quickly and easily add their iPhone 3G to their existing hosted Exchange mailbox and new iPhone 3G users can set up a hosted Exchange account in minutes, enabling them to start using this industry-leading enterprise-class messaging and collaboration tool for a small monthly fee."

Mobilizing businesses increases corporate productivity and enables employees to remain connected wherever they may be. 123Together.com's hosted Exchange service provides small and mid-size businesses with immediate access to enterprise-class messaging and collaboration solutions at a price they can easily absorb. 123Together.com's live 24 x 7 technical support also ensures that their questions will be answered any time of the day or night by Exchange experts based at the corporation's headquarters in the United States.

About 123Together.com
