

New Michigan Ave Office Expansion Announced By Chicago Dental Practice, Art Of Modern Dentistry

The Chicago Cosmetic Dentist Office, Art of Modern Dentistry, has announced the opening of a new location on Michigan Ave this fall. The new facility will feature the newest technologies to both treat and educate cosmetic and general dentistry patients.

July 14, 2008 (FPRC) -- Chicago, IL-- Art of Modern Dentistry has announced that their new location on Michigan Ave will be fully operational this fall. The 3,000 square foot dental office features the newest technologies and the latest in modern design, making it one of the newest and technologically advanced premier dental offices of its kind in the United States.

The design of the facility will include a total of nine treatment rooms as well as a dedicated area for the education of both clients and staff. Once the new Chicago cosmetic dentist office is fully operational, Art of Modern Dentistry's current office in the South Loop will be converted and reopened to focus solely on pediatric dentistry.

"With the large number of young families relocating in and around Chicago's South Loop, we feel that this expansion will give them even greater access to our services. It is so important for kids to get early dental care. Converting our South Loop location allows us to focus solely on kids to ensure that they not only get that early care, but actually enjoy the experience as well," said, Dr Nikoo Daftary, Managing Dentist of Art of Modern Dentistry (<http://www.artofmoderndentistry.com/>).

The Chicago dental practice focuses on the enjoyment and relaxation of the patient while working to give the patient a beautiful, healthy smile. Art of Modern Dentistry provides general dental procedures as well as full dental makeovers to residents in and around Chicago. Zoom Whitening, a popular teeth whitening procedure, Invisalign, and Botox treatments are also available in a comfortable and relaxing environment.

"The look of someone's smile can have a drastic effect on their self-image. That's why we constantly educate ourselves on the newest available dental techniques. We want to ensure that our patients can look and feel their best with minimal discomfort," said Dr. Daftary.
