

## Find Out How Your Web Hosting Service Scores Against the Competition with a New Web Hosting Review Website

*Discover the premier independently owned and operated web hosting review source.*

November 29, 2008 (FPRC) -- Web Hosting Review Zone is allowing people to see how their web hosting service compares to the competition. It offers customers reviews of the web hosting websites, and shows people how their hosting company stacks up against the competition.

Web Hosting Review Zone ([www.webhostingreviewzone.com](http://www.webhostingreviewzone.com)) uses multiple criteria in order to rate web hosting services. They look at price, features, and software in order to rate the site on a scale of one to ten. After each feature is rated, the company then averages out the different ratings in order to come up with an overall rating for the hosting service.

They have created a list with their rankings in order to show the public how website hosting services compare to others. The purpose of this site is to give consumers the information they need in order to pick a web hosting company.

Web Hosting Review Zone points out clients who are unhappy with their hosting service can take their domain name to one of their hosting service's competitors. Because of that, they encourage people to look at their reviews and see how their current hosting service compares to the competition.

Web Hosting Review Zone was formed in order to provide an impartial reviewing service to the public. The website hosting reviews offered are unbiased. Those interested in finding out more about web hosting services can visit them online at [www.webhostingreviewzone.com](http://www.webhostingreviewzone.com). They can then browse through the different hosting services that have been reviewed.
