

MIE Solutions Announces Paperless Shop Touch Screen Data Collection for Its MIE Trak ERP Software

MIE Solutions, a proven leader in the software industry, has created revolutionary shop floor data collection software running on windows which makes use of production scheduling to enable a manufacturing shop to go paperless.

January 5, 2009 (FPRC) -- MIE Solutions, a proven leader in the software industry, has created revolutionary shop floor data collection software running on windows which makes use of production scheduling to enable a manufacturing shop to go paperless.

MIE Trak Kiosk data collection software makes using barcode technology to capture employee work through a manufacturing job shop a relic of the past. MIE Trak Kiosk has an easy to use interface with large buttons which enable employee's to clock in/out for the day, in/out of jobs and issue bill of material to jobs for job costing.

MIE Trak Kiosk is unique because it integrates with scheduling software which enables the capability to highlight all the jobs an employee is scheduled to work on. Dragging and dropping jobs onto the scheduling whiteboard will immediately change the jobs employee's see as the clock into their machine and associated job. Eliminating keystrokes is a key to managing data collection and that is precisely what MIE Kiosk does as recently viewed items are shown in plain site on the computer screen. To actually go paperless MIE Kiosk enables employee's to display drawings, blueprints and models on the computer screen eliminating extra paper flowing through a lean shop.

MIE Solutions provides an integrated environment to all its products including document management with MIE Docs and integration into MIE Exchange B2B supply chain software application. Customers can now enter purchase orders online through MIE Exchange and those purchase orders a securely transmitted directly into the MIE Trak production control and tracking system to eliminate data entry errors.

Please visit our website at [http:// www.mie-solutions.com](http://www.mie-solutions.com) to view the latest information and see some screen shots of MIE Trak Kiosk.

MIE Solutions also provides a free Quotelt! trial to try the best estimating system in the manufacturing industry. MIE Solutions also offers MIE Exchange which intelligently connects buyers with suppliers providing the custom manufacturing industry with a fast, efficient network of sourcing and supply opportunities. MIE Exchange enables buyers and suppliers to communicate through communities which then allow Request For Quotes, Bids, Purchase Orders, Catalog Management, Document Management and Inventory Management.
