

Medical Contract Manufacturing Company C&J Industries Upgrades Its Medical Packaging Capacity

C&J Industries, a complete custom medical contract manufacturing and plastic injection molding company has added the MD-1612 Shuttle Style Deep-Well Tray Sealer to its suite of medical device manufacturing equipment.

January 8, 2009 (FPRC) -- MEADVILLE, PA - C&J Industries, a leading medical device manufacturing and plastic injection molding company, has added the MD-1612 Shuttle Style Deep-Well Tray Sealer to its current line of medical device packaging capabilities.

C&J provides one-stop medical contract manufacturing solutions for customers. They offer product design, prototyping, production molding, assembly and custom packaging through their contract manufacturing business.

The tray sealer is designed to package products that are produced in either a Class VII or Class VIII clean room environment.

"Because the tray sealer can be both validated and calibrated, our packaging can meet stringent IQ/OQ protocol requirements," says Mark Fuhrman of C&J Industries (<http://www.cjindustries.com/>).

The MD-1612 is a valued addition to C&J's current medical custom packaging capabilities. This currently includes auto bagging and polybag heat sealing. Using the MD-1612, custom packaging can be created for almost any item that fits into packaging with dimensions of up to 16" x 12" and up to 6" deep.

C&J Industries specializes in fabricating high precision and complex injection molded components and assemblies for the medical, pharmaceutical, telecommunications, industrial, transportation, consumer and business machine markets.

About C&J Industries: C&J Industries (<http://www.cjindustries.com>) is a plastic injection molding and contract manufacturing company offering product design and development services, tooling services, material processing and contract manufacturing at competitive prices. They have been serving customers in these industries for more than fifty years
