

Copy Music, Videos, and Photos from your iPod to your PC

Vowsoft has released iPodRobot iPod to Computer Transfer, a powerful utility that makes it easy to copy batches of songs, videos, photos, and playlists from your iPod into your Windows folder or iTunes library.

February 10, 2009 (FPRC) -- Vowsoft has released iPodRobot iPod to Computer Transfer, a powerful utility that makes it easy to copy batches of songs, videos, photos, and playlists from your iPod into your Windows folder or iTunes library. Never lose music, photographs, or movies again. With this new software application, you can reinstall your system and your iTunes library, or simply move multimedia files from your iPod to your PC.

It's easy to back up all your music, videos, pictures, and playlists from your iPod to a new Windows computer. Share your iPod files with a friend. Or use iPodRobot iPod to Computer Transfer to restore files that you lost during a system crash or other catastrophe.

iPodRobot iPod to Computer Transfer works with all iPod versions, including the newest iPod Touch and iPhone models. When you move music to your PC, you preserve the order of the songs, as well as song ratings, play counts, comments, and volume adjustments. It's easy to transfer your playlists with their folder structures back to iTunes, and rebuild your iTunes library.

The software protects your iPod against unwanted iTunes synchronizations. It will automatically reject duplicate files when importing music to your iTunes library. The skinnable user interface lets you select the look and feel that suits you.

iPodRobot iPod to Computer Transfer is extremely easy to use. Simply connect your iPod or iPhone device to your PC, and run the program. Select the music, videos, pictures, and playlists that you want to copy. And choose to copy your files to iTunes or to another folder. The software moves all of your files, automatically and safely.

iPodRobot iPod to Computer Transfer runs under Windows 2000/XP/Vista. You'll need Apple iTunes 7.0 or newer if you want to copy to iTunes directly. A single-user license costs \$19.95(US). Lifetime upgrades are available without charge. You can purchase the software securely online, or download the 7-day trial version, from <http://www.iPodRobot.com/>.
