

## **CD Solutions Upgrades Printers To Provide Higher Quality DVD & CD Duplication Services**

*To take advantage of the highest quality printing available in the market today, popular CD & DVD duplication firm, CD Solutions, recently upgraded its inkjet printers to Epson Discproducer printers to better serve its customers.*

March 24, 2009 (FPRC) -- PLEASANT HILL, OH -- CD Solutions, a provider of quality DVD & CD duplication services, recently announced that it has upgraded its printing equipment from standard inkjet printers to new Epson Discproducer printers. The firm's investment in the new printers reflects its dedication to providing its customers with a high quality duplicated product with a fast turnaround time, without sacrificing quality.

Since its inception in 1993, CD Solutions, Inc. has quickly grown to become one of the largest full service CD & DVD replicator companies with expertise in duplication, as well as proficiency of the CD and DVD packaging industry. With a commitment to providing quality products to its customers, CD Solutions was first recognized in the recordable media industry for its extremely fast turnaround times, as well as its ability to create some of the first hybrid discs.

Today, the firm continues to offer superior service and fast turnarounds (often the same day data is received) for CD and DVD duplication. In addition to standard CD and DVD replication services, CD Solutions also sells duplication hardware and CD and DVD media. CD Solutions' experienced team helps its customers take all of their duplication projects from the computer to finished product. With clients ranging from small single disc customers, to large corporations and even government entities, CD Solutions' primary business comes from repeat customers who have been satisfied with the firm's past duplication services.

"At CD Solutions, we are committed to providing high quality duplication services with some of the fastest turnaround times in the industry. By investing in new Epson Discproducer printers, we are now able to more efficiently handle even the largest duplication jobs in a timely and professional manner," says Jerry Warner of CD Solutions. (<http://www.cds.com>)

One of the premier CD & DVD printers available today, CD Solutions' new Epson Discproducer printers feature six-color printing technology. The superior printing technology rivals disc labels printed by even the best Hollywood studios and is capable of printing seamlessly on either glossy or matte media.

"We are thrilled at the enhanced printing capabilities that our new Epson Discproducer printers provide. With our investment in new technology, CD Solutions now offers some of the highest quality printing services in the industry," says Warner.

About CD Solutions: Since 1993, CD Solutions, Inc. (<http://www.cds.com>) has provided superior quality DVD & CD duplication services to clients across the country. CD Solutions is a full-service CD & DVD firm specializing in faster turnarounds for duplication as well as affordable replication services for larger jobs. They also offer a variety of packaging options and duplication equipment sales. With clients ranging from single disc customers to large government entities, the knowledgeable and highly trained staff at CD Solutions works hard to find the best duplication

solutions to meet every client's needs.
