

Raleigh Comprehensive and Cosmetic Dentistry Earns Certification For Sedation Dentistry

Renowned Dentist Robert L. Williamson III, DDS of Raleigh Comprehensive and Cosmetic Dentistry is one of the few Doctors in Practice in North Carolina to earn the certification for oral sedation dentistry.

May 5, 2009 (FPRC) -- RALEIGH, NC – Raleigh Comprehensive and Cosmetic Dentistry, Dr. Robert L. Williamson III and Associates, announced recently that the practice has earned its certification in oral sedation dentistry. With the Practices fully accredited status, it is now certified to provide moderate oral conscious sedation at the 119 North Boylan Avenue office in Raleigh, North Carolina.

For the protection of the public, the North Carolina State Board of Dental Examiners now strictly oversees dental treatments requiring moderate conscious sedation. Because the certification is so difficult to attain, very few practices have secured the accreditation necessary to offer sedation dentistry in Raleigh.

“I am very pleased to be accredited as a sedation dentistry provider in Raleigh, NC. I would like to express how proud I am of my staff at Raleigh Comprehensive and Cosmetic Dentistry applying their expertise and efforts to make the accreditation process a smooth and overwhelmingly positive success,” says Dr. Williamson of Raleigh Comprehensive and Cosmetic Dentistry.

In fact, Dr. Williamson and his staff were given numerous accolades by the site visit committee during the final phase of certifying full accreditation. Specific policies and regulations adopted by the North Carolina State Dental Board are helping to ensure dentists administering this level of sedation are fully trained and qualified in providing this type of treatment.

Sedation dentistry can be administered for a wide variety of dental procedures, from a standard cleaning to in-office treatments such as fillings, implants, crowns, root canals and veneers. Sedation dentistry allows patients to become less anxious about treatments and under sedation, the time passes very quickly. Additionally, with sedation dentistry, certified dentists are able to perform more procedures in one appointment which is often difficult for patients who do not elect to receive this type of treatment.

For more than a decade, Dr. Williamson has been providing professional dental services to patients in Raleigh, NC and the surrounding region. Along with sedation dentistry, Dr. Williamson and the Associates of Raleigh Comprehensive and Cosmetic Dentistry offer a wide range of comprehensive dental treatments, as well as cosmetic and implant dentistry services. The practices well-rounded scope of dental procedures and exceptional patient care have helped the practice to become one of the region’s premier dental health care providers.

To ensure they are receiving the safest dental treatment possible, it is important for patients to seek out practices that have been accredited to provide oral sedation dentistry. “I am very pleased to be able to provide this extremely valuable and needed service to the citizens of Raleigh and the State of North Carolina,” concludes Dr. Williamson.
