

## **Barina Craft's Home Bars are Bleached Blonde Optional**

*Barina Craft, a manufacturer of home bar furniture, is introducing a blonde accent stain treatment to join their standard optional choices for Summer/Fall 2009.*

May 28, 2009 (FPRC) -- Dublin, OH - Barina Craft, a manufacturer of home bar furniture, is introducing a blonde accent stain treatment to join their standard optional choices for Summer/Fall 2009.

A light amber colored stain application over bleached wood maximizes this stunning effect. This 'blonde' finish has highlighted covering and ceiling boards, king planks, spray rails, cockpit surrounds and other classic wooden boat elements over the years. Used in various combinations, they make a bold style statement. You may now add some character to your own home bar by requesting this detail.

The three main stain choices offered as standard can be combined with a walnut or blonde accent as well as all by themselves. All are beautiful with the final decision influenced by personal preferences, bar integration into your home's interior design, fond memories and more. The recent introduction of a flush bar top option continues to expand an already extensive list of customization available. Selections include style, stain, woods (mahogany, oak, teak & holly), wine rack, stemware holders, shelves, bottle wells, dry sink / fruit pan and more. Along with a locking liquor cabinet, ball bearing sliding drawer and personalization your home bar wish list will be uniquely fulfilled. Refer to the boat bar design elements page for actual comparison examples.

Founded in 2007, Barina Craft offers custom bar furniture shipped throughout the contiguous United States thru their website at <http://www.barinacraft.com/>. Their home bars feature boat constructed, marine inspired and nautical themed designs. All furniture is handcrafted by artisans in the USA utilizing steam bent solid mahogany and other hardwoods. Special requests for features or customization not listed as standard are considered.
