

Group Releases Making A Killing Video

A video documentary reveals how normal active children are forced into taking mind altering and addictive drugs with damaging and sometimes fatal consequences.

A riveting video documentary which exposes the field of psychiatry as a money-grubbing industry dedicated to making a profit at the expense of the mental health of their own patients has been made available on the website of the Vancouver Chapter of the Citizens Commission on Human Rights.

Through rare historical and contemporary footage and interviews with many doctors, attorneys, educators, survivors and experts on the mental health industry and its abuses, the riveting documentary “Making a Killing: The Untold Story of Psychotropic Drugging” blazes the bright light of truth on the brutal pseudo science and the multibillion dollar fraud that is psychiatry.

Brian Beaumont, the president of the Vancouver chapter of CCHR said, “There isn’t a single aspect of behavior that doesn’t fall within the broad ‘symptoms’ which comprise so-called ‘mental illness. We want all people to see, through watching the video, how psychiatry’s ability to convince drug companies and governments to pour billions of dollars into its practices is based upon fraudulent ‘diagnostic’ criteria and how psychiatrists package various behavior and emotional characteristics and falsely categorize these as a ‘disease’ or ‘disorder’”.

The DVD reveals how normal active children are forced into taking mind altering and addictive drugs with damaging and sometimes fatal consequences and how their parents are powerless against the coercive onslaught of falsehoods opinions and the ‘chemical imbalance’ hoax Which is foisted on them as ‘fact’.

The Citizens Commission on Human Rights was established by the Church of Scientology to investigate and expose psychiatric violations of human rights. To view the video or to report your own or another’s abuse case go to www.psychharm.ca.
