

## **Miami Health Insurance Agency EHealthInsurance.com Donating Time In August To Help the Uninsured Get Coverage**

*Florida Health Insurance Brokerage Donate time to help Florida Residents not able to qualify for medical insurance in August.*

August 8, 2009 (FPRC) -- Miami , Florida EHealthInsurance.com a Florida based health insurance company has spotlighted the month of August as its month to help Floridians. According to Vice President of Marketing Caroline Ehrenthal, "there really wasn't much to the decision, as August is the only month every year that is open for one man group enrollments, in addition due to the seasonality spikes of Florida our summer is much slower as the population shrinks so dramatically, and finally Medicare enrollments will not start until after fall."

Thus if you are currently without medical coverage and have been putting off a medical issue as you don't have insurance or money to pay cash EHealthInsurance.com (East Coast Health Insurance) is offering its services as a Health Resource Center to help you sign up with the many Florida health programs that most citizens don't even realize are available. Mrs. Ehrenthal goes on, "Most Floridians don't realize this, but nationally 30% of the 50 million or so uninsured are eligible for assistance, and due to the depressed Miami market this number will hover closer to 40% in Florida."

Additionally, with the August open enrollment period for one man groups people should certainly be calling us for advise or a free consultation. "Most health insurance brokers won't even consider writing a one-man group due to the fact there are no commissions paid on them and the health insurance companies certainly don't like the business or the brokers that write it as it distorts their profit margins. This is because generally one man groups are for the uninsurable or people that pose a higher medical risk and have been turned down for individual plans. Indeed these plans can be significantly more expensive then individual plans, but they are the best option if you can afford them and if you earn too much for a Florida assistance program like Medicaid or a county health plan and have been denied for an individual health plan. Ehrenthal warns against signing up with Cover Florida plans no matter who the health insurance company is due to, "the many shortcomings of these plans." And finally if live in Miami-Dade County, the new Miami Dade Blue plan can be an affordable life saver. EHealthInsurance has been finding the newest most affordable health plans for Floridians year after year and we offer free Florida Health Insurance quotes at our website <http://www.EHealthInsurance.com/floridaindividualhealth.html>
