

## Eye Magic Offers Non-Surgical Droopy Eyelid Fix

*Eye Magic Company announces an innovative product for eyelid drooping which creates the look of an eye lift without upper eyelid surgery. Eye Magic's eyelid strips can be easily applied and removed, with no evidence of the product being worn.*

WOODLAND HILLS, CA (FPRC) August 28, 2009 -- Eye Magic Co. offers an innovative anti-aging product that provides a non-surgical solution for those in need of an eyelid lift. The product allows people with sagging, hooded, or drooping eyelids to instantly achieve the look of an eye lift without upper eyelid surgery (blepharoplasty).

'This is a product that addresses my own personal issue, and now I can't live without it. People say I look 10-15 years younger. I'm so glad that people are using Eye Magic to help bring back their beautiful eyes,' says co-founder Cecily Heavenridge.

The product is designed to restore the eye's natural curve by holding up sagging skin above the eyelid. Although similar to eyelid tape, Eye Magic is different. Gel is applied to an adhesive backing on a transparent strip, allowing for perfect placement and easy removal, without evidence of the product being worn. The product is designed for daily use and each box contains enough for 30 days use (a one month supply), but is also recommended for special occasions, photographs, makeovers, makeup artists, or even eye disfigurements or muscular conditions.

The Eye Magic eyelid lift is available at <http://www.eyemagic.net> starting at \$24.95 for the Combo Kit, which is recommended for first time users. Eye Magic Company was formed in 2009 to offer an eyelid cosmetic for those with drooping upper eyelids. The company has plans to release additional products to beautify the eyes and support a vibrant, younger look without the need for surgery.
