

Snider Advisors Releases New Investment Course, Your Financial Blueprint: Practical Strategies for Managing Economic Uncertainty

Snider Advisors, a leading provider of investor education, introduces Your Financial Blueprint, an investment course offering practical strategies for managing economic uncertainty.

August 31, 2009 (FPRC) -- The days when an investor's best bet was to buy and hold a diversified portfolio are long gone. Many Americans find themselves unprepared for the challenges and complexities of funding their own retirement. Your Financial Blueprint: Practical Strategies for Managing Economic Uncertainty is Snider Advisors solution to this quandary. Using the Snider Investment Method® as its cornerstone, this leading-edge investment course takes a comprehensive approach to equipping investors with the education necessary to develop and implement practical strategies for managing economic uncertainty.

Founder and CEO of Snider Advisors, Kim Snider, said, "We are delighted to have a platform that allows people to see the big picture of their financial situation." She continued, "Our course will offer concrete, practical skills and tools that increase the understanding, management and control of financial security. Participants will receive a unique and valuable perspective on how the world of finance works and how they fit in."

The Your Financial Blueprint investment course will be offered as a live, two-day, intensive class in the Dallas/Ft. Worth area and will be taught by Kim Snider and Shelley Seagler. Seagler is Snider Advisors' Manager of Investor Education. The course will include a variety of lectures, exercises, interactions and discussions that will help each person discover and implement practical strategies for managing the economic uncertainties created by job loss, illness or disability, stock market fluctuations and retirement. Each participant will be expected to fully participate and complete assignments before, during and after the course.

At the end of the course, each attendee will have created a one-page financial blueprint built on the specifics of their unique situation, as well as a paint-by-number method of investing, which aligns with their resources and objectives. Additionally, Snider Advisors offers long-term accountability coaching to ensure that participants implement and follow through. There is no formal registration fee for this investment course. At the end of the second day, participants will be asked to determine their price based on the value they feel they received during course.
