

CertExams.com CCNA Network Simulator and Visualizer

SimulationExams.com, a leading network simulators provider released a major revision for Cisco CCNA (CCNA stands for Cisco Certified Network Associate) network simulator. The netsim is intended for candidates preparing for CCNA certification, and enables one to have hands-on practice with router/switch network in a simulated environment.

September 26, 2009 (FPRC) -- CertExams.com, a leading network simulators provider has recently released a revised version of Cisco CCNA network simulator. CCNA Certification is awarded by Cisco Systems on successful completion of qualifying exam(s). CCNA is intended for candidates who have just started working on Cisco routers and switches. For candidates aspiring for CCNA certification, CertExams.com CCNA netsim provides a good hands on practice. The advantages of using CCNA network simulator include the following:

- CCNA Lab exercises for hands-on practice.
- Router and switch simulator
- Simulate Cisco® IOS routers (2501/2503/2610/2620) or switches (1900 or 2950).
- Support for 200+ router and switch commands
- Labs for 1900 and 2950 switches included
- Detailed Lab manual and help files
- Network designer that provides drag and drop feature for inserting devices and connectors. GUI based device configurator.

Support short form commands. You can type short form commands in IOS simulator for router/switch commands just like in actual router/switch.

The exam objectives covered by CCNA certification include the following:

1. Describe how a network works
2. Configure, verify and troubleshoot a switch with VLANs and interswitch communications
3. Implement an IP addressing scheme and IP Services to meet network requirements in a medium-size Enterprise branch office network.
4. Configure, verify, and troubleshoot basic router operation and routing on Cisco devices
5. Explain and select the appropriate administrative tasks required for a WLAN
6. Identify security threats to a network and describe general methods to mitigate those threats
7. Implement, verify, and troubleshoot NAT and ACLs in a medium-size Enterprise branch office network.
8. Implement and verify WAN links

Other simulators offered by CertExams.com include the following:

1. CCENT Simulator with Practice Tests
2. Juniper Junos Simulator for JNCIA
