

New Book Released: How the Average Investor Can Beat the Market!

New book launched to dispel the myth that only professional traders can beat the market. "Inter-Economic Market Allocation: How the Average Investor Can Beat the Market!" is available now.

October 1, 2009 (FPRC) -- Peter Casula Jr and Rosedog books are pleased to announce the release of Inter-Economic Market Allocation: How the Average Investor Can Beat the Market! A startling new book which gives the average investor a new way to think about Asset Allocation and Portfolio Management.

This new book covers many of the complicated fields in the investment market and shows the reader how it is possible to create long term gains and invest for your retirement. Covering such subjects as Asset Allocation, Portfolio Management, Market Psychology, Peter goes on to look at the dynamics of Inter-Economic Market Allocation and his Mixed Breed Model Portfolio.

Peter is keen to emphasize that we should all be saving for the future and for our retirement, but you don't need thousands of dollars to start investing. In his book Peter shows how all you need is to put aside what you have left over every month from your living expense, even just ten dollars.

"The purpose of my book is to give the Average Investor a new way for them to think and comprehend what Asset Allocation and proper Portfolio Management can do for them" said Peter Casula Jr, the author. "I also wanted to encourage my family and neighbors to save for their retirement."

Peter has been managing his family retirement fund since 2003, from that point on to the present he has managed to perform double digit returns.

Conventional wisdom would suggest that the average investor couldn't beat the market in the long-term but by reading Peter's book you will learn essential techniques and read analysis of the markets which will help your portfolio in the long term. Chapter Six of the book is dedicated to how to invest when the economy and the market are in volatile times.

Inter-Economic Market Allocation: How the Average Investor Can Beat the Market! is available in Paperback or in electronic format (as a PDF) from Rosedog books.

About Peter Casula Jr.

Peter lives in Clinton CT with his family and started investing in the stock market in 1984. After studying and developing several different techniques of investing over the years, Peter decided to write a book and share his experiences with others.
