

Fashion Matrix Accounting Software : A New Trend for Fashion Retail Industry

A new dimension in accounting/ERP software has been discovered with the release of the Fashion Matrix designed exclusively for Sage MAS 500 accounting software www.accounting-software.accessiontechnology.com/sage-mas-500-erp/. The capabilities of this comprehensive sales order entry, inventory, and warehouse management solution presents an ideal option for distributors and business owners in the apparel/footwear industry. The Fashion Matrix inventory system, now offered by Accession Technology, reduces the TCO (Total Cost of Ownership) for accounting software systems designed for the apparel fashion business.

October 28, 2009 (FPRC) -- The specific capabilities of attribute maintenance, sales order entry attribute display, pre-pack maintenance, and fill rates are included within the Fashion Matrix. Apparel distributors can now research clothing by size, style and color while easily analyzing and tracking their products and their availability through the inventory software. By utilizing the many capabilities of the Fashion Matrix customers benefit; whether it's receiving information from the software on all the hippest seasonal trends or ensuring your clients' trust by tracking customer orders.

The Fashion Matrix gives its users more while keeping it simple and familiar. All of your products, costs, stock holdings and re-ordering strategies are held within the accounting software program. The Fashion Matrix Sales Order Entry Screen is accessed from the regular MAS 500 <http://accounting-software.accessiontechnology.com/sage-mas-500-erp/> Sales Order Entry. From here you can manage your business with automatically-produced spreadsheet-like tables for ordering, costing, receiving and other aspects of managing inventory.

"By applying this addition to the MAS 500 ERP accounting software, our clients will enjoy a reduction in TCO and will also be provided with more flexibility and oversight in assessing their product without feeling overwhelmed." said Aric Shelko, president of Accession Technology.

About Accession Technology

Accession Technology, is a single source for business software expertise, offering software solutions, needs analysis, implementation, custom reports, training and support services to a wide list of clients throughout the United States.
