

## **Skyline Orlando Service Center Launches New Rental Options for Trade Show Booths in Orlando**

*Skyline Orlando Service Center adds additional new products to its innovative lineup of rental displays and trade show services in Orlando.*

November 24, 2009 (FPRC) -- ORLANDO, FL -- Leading trade show services company, Skyline Orlando Service Center has recently launched a variety of new products which are now available for rent in Orlando.

The new rental products available for trade show booths include the Envoy™ Modular Exhibit System, Skyline LED Lighting, InterfaceFLOR® Carpet Tiles, DesignView™ Presentation Systems and Mirage® Backlit Pop-Up Displays.

"Our new products allow trade show planners to use the latest innovations in trade show booths without the up-front investment of purchasing portable displays. Since Orlando is a prime trade show market, our new product offerings will be readily available from our Orlando-based service center with minimal shipping costs and fast turnaround time," says Tom Coffey, Global I&D Manager of Skyline Orlando Service Center (<http://www.skylinecfl.com>).

Trade show services organizers are often in a quandary when it comes to shipping trade show booths to the destination because of the costly shipping and investment in upgrading to the latest innovations in portable displays. By turning to Skyline for rental displays including the new Envoy Panel System, DesignView Presentation Systems or Mirage Backlit Pop-Up Displays, exhibitors can simply come to the show with the graphics for their display or have Skyline handle everything from design to installation.

Skyline Orlando Service Center offers install & dismantle services to minimize the time invested before and after trade shows. The Skyline staff is experienced trade show I&D professionals and are able to efficiently and accurately install and dismantle the trade show booths. If organizers wish to employ their own I&D staff, Skyline also provides supervisors who look over the work of the staff as trained professionals.

Often trade show exhibitors turn to Skyline Orlando Service Center with little notice because their trade show booth got lost en route to its destination, got damaged, is missing key components or just doesn't sizzle once it is set-up on the exhibit floor. Skyline's new products will come in especially handy to exhibitors who find themselves in such situations. Additions such as LED Lighting can create excitement to any exhibit through light shows, spotlights or color illumination. The new InterfaceFLOR Carpet Tiles can spruce up any drab space creating a more inviting exhibit to draw prospective customers. You can learn more about these new items that are available for rent on their new products page: <http://www.skylinecfl.com/New-Products/>
