

Skyline Exhibits Las Vegas Rounds Out Event Management Services With In House I&D Department

Leading provider of trade show booths, Skyline Exhibits Las Vegas has announced the launch of its brand new Installation & Dismantle (I&D) department, headed by industry service expert Ray Glomski.

December 7, 2009 (FPRC) -- LAS VEGAS, NV – Industry leading manufacturer of Las Vegas trade show displays, Skyline Las Vegas has announced its brand new I&D department as part of its event management services. The introduction of Skyline I&D closes the loop in the list of trade show services provided by Skyline.

Skyline Exhibits Las Vegas is a leading provider of exhibit systems and event management services. From the design and manufacture of trade show booths to exhibit set up, Skyline provides clients with a plethora of trade show related services. The new in house I&D service group is an additional feather in the cap for an organization that is already a clear leader in the industry.

With the addition of Skyline I&D, Skyline Las Vegas now offers design, production installation, dismantling, storage and maintenance of exhibits for clients – all unified under one roof. The new Installation & Dismantle (I&D) department will be headed by industry service expert Ray Glomski.

"Ray is well known and respected in the exhibit service community. He has years of experience and brings a wealth of knowledge not only from an I&D aspect, but in customer care as well. He is truly committed to helping clients in any situation with any need," stated Craig Tedrow, Director of Global Services at Skyline Las Vegas.

As an in-house division of the company, Skyline I&D makes it possible for the company to know the products from its design and production stage to its pre-show staging. Prior knowledge of the trade show exhibits helps the installation and dismantling process and greatly reduces the chances of error. As the leader of the I&D team, Glomski himself has been associated with Skyline Exhibits and knows and understands its systems and people within its dealer network, which is a huge advantage for the Skyline Team.

By removing outside parties from the equation, Skyline can offer clients a variety of trade show services as a package deal, giving customers peace of mind with no additional hassles or costs. As a result of being able to provide a unified list of event management services, Skyline also provides its clients with competitive pricing, allowing them to obtain quality trade show management services at affordable prices.

"Whether clients purchase or rent, we can control their entire exhibiting experience in Las Vegas without relying on outside sources. We can ensure quality service and provide peace of mind. There's no question that our operation in Las Vegas will set the standard for service and exhibitor satisfaction," said Michael Vekich, Executive Chairman of Skyline Exhibits Las Vegas.

About Skyline Exhibits Las Vegas:

As part of the sales and production of North America's leader in exhibit systems, Skyline Exhibits Las Vegas is known for superior manufacturing, cost-effective portability, innovative functionality,

exhibitor education and creative design services. Skyline Exhibits manufactures a broad selection of trade show products, including pop up and banner stands displays to large-scale, customized modular exhibits.
