

## **iTravelAlert: The iPhone Application that Keeps its Users Safe while Traveling**

*iTravelAlert is designed to provide its users with essential information on current travel warnings, disease outbreaks and more.*

December 15, 2009 (FPRC) -- iTravelAlert, E-MAGINE's first iPhone app, has been officially launched. E-MAGINE developed iTravelAlert to provide millions of iPhone and iPod Touch users with essential travel and health information, keeping them informed and safe. Suggested vaccinations, disease outbreak news, current travel alerts and warnings can all easily be accessed through this application. iTravelAlert is currently the only app that offers full real-time information and news on international travel safety and health. <http://www.itravelalert.com>

In the past, traveling was carefree but times have changed. Now the fear of terror attacks and pandemic outbreaks leave even the most seasoned traveler feeling insecure. iTravelAlert give its users peace of mind to focus on business or pleasure.

"iTravelAlert is not just for business executives or frequent travelers who want to be informed about current threats around the world, but also for families and friends who want to stay on top of what's happening in countries where their loved ones are traveling or living," said Josef Holm, CEO of E-MAGINE.

The iTravelAlert app offers the following features:

- Homeland Security News
- Emergency and Disaster News
- H1N1 Pandemic News
- Disease Outbreak News
- Avian Influenza News
- Current Travel Alerts
- Current Travel Warnings

iTravelAlert acquires all of its information from the most serious sources, such as the World Health Organization and the Department of Homeland Security. All news feeds are in real time, insuring that iTravelAlert is always up to date.

Now anybody with an iPhone or iPod Touch can stay thoroughly informed about secure traveling whenever they go anywhere in the world. The app is now available in the iTunes App Store, for USD \$1.99. It can easily be found by searching for "Travel Alert." To check out the application go to <http://www.itravelalert.com>.
