

Phpassjobs.co.uk, UK's Only Job Site Dedicated to ASP.NET Jobs, PHP Jobs and Other Web Jobs, Announces New Blog

phpaspjobs.co.uk just announced the launch of its blog. Phpassjobs.co.uk is UK's only job site dedicated to web jobs. Currently the most sought after ads on the site are for web developer jobs, web designer jobs, SEO specialist jobs, asp.net jobs and php jobs.

December 17, 2009 (FPRC) -- Phpassjobs.co.uk just announced the launch of its blog as part of a recent drive to provide more services to its users. The blog will allow users of phpassjobs.co.uk to participate in or learn about events and activities members of the phpassjobs.co.uk team organize or contribute. These events typically include presentations and participation in fairs.

In addition, the users will be able to benefit from research and studies distributed by the team members. One such publication will be the 'Web Skills Focus', an information bulletin that provides career related information to jobseekers about various web skills, with some of the early issues expected to cover asp.net jobs, php jobs, web design jobs, SEO jobs, Flash jobs and HTML jobs among other key skills. The first issue of the bulletin covers asp.net jobs in UK, while the latest issue covers PHP jobs in UK. This issue provides information regarding average compensation for permanent and contract PHP developers in UK as well as the changes in PHP job market over time. There is also information regarding UK cities that provide the most PHP opportunities. The phpassjobs.co.uk team expects the launch of the blog to boost interaction with users and create a stronger user community.

To check out the 2000+ web jobs currently available, visit www.phpaspjobs.co.uk. Alternatively you can view the newly launched blog at <http://www.phpaspjobs.co.uk/blog>.
