

## **Graphik Connexions Furthers its Success with the Launch of GC Learning Services LLC**

*Continuing to provide high-quality e-Learning services to clients, both in the U.S. and overseas, Graphik Connexions is taking its custom solutions to the next level with the launch of its new corporation, "GC Learning Services LLC."*

Hightstown, NJ – December 17, 2009 – Graphik Connexions, the well-established virtual e-Learning company located in Central New Jersey, has recently announced the formation of its new company name and corporation, GC Learning Services LLC. GC Learning Services LLC will be launching its new website, gclearningservices (dot) com, on Thursday, December 17, 2009, and is expecting to see an outstanding and overwhelming response. The new website boasts a more corporate image and feel, easy navigation, and a wide range of e-Learning resources. GC Learning Services LLC has also developed a new logo that is indicative of learning blended with technology. The business formerly known as Graphik Connexions has already seen a large degree of success offering custom e-Learning services but is looking to expand its success even further through the formation of its corporation, servicing even more Fortune 500 to Fortune 5000 companies.

Since 1996, Graphik Connexions has been the go-to company for quality instructional design and e-Learning services for various businesses and industries throughout the nation. They have become much more than an e-Learning company, however, through their community-based programs, beneficial student internships, and commitment to helping other businesses through this struggling economy. The company is quickly setting an example for the new marketplace by providing high quality services at affordable, flat rate pricing, and setting high standards for learner retention rates.

Their tried and true experience is currently allowing them to provide service to all industries, and the formation of their corporation will permit the company to take everything to the next level. Due to the rapid growth of the organization, GC Learning Services LLC is expanding its staff in order to serve more clients. Although they currently maintain a long list of experienced and degreed instructional design professionals, the company has grown so much in the last year that there is a need for additional talent. Because of this need, they are aggressively advertising on The eLearning Guild for highly experienced, creative, out-of-the-box-thinking, instructional designers.

GC Learning Services is excited about the new LLC and the promise that it brings. Owner and CEO Cheryl McNeil comments, "We are very excited about becoming an LLC. As far as the name, Graphik Connexions has always been referred to as GC, so the new name GC Learning Services is a very simple incorporation of that. So, we are now known as GCLS."

The new contact information for GC Learning Services LLC can be found on the Contact page of the new web site.

### About GC Learning Services LLC

Cheryl McNeil, the sole owner and CEO, established Graphik Connexions in 1996. Because of their strict devotion to helping businesses strategically via their revolutionary e-Learning and quality instructional design products, Graphik Connexions quickly climbed to the top of the industry. Now

they are known for their unparalleled customer relations, competitive pricing structure, veracity, and creative imagination. They pride themselves on making a beneficial impact on ROI, learner retention rates, and employee productivity numbers.

Graphik Connexions, now known as GCLS, has now taken its business to the next level by forming a corporation. For additional details on GC Learning Services LLC, and the custom e-Learning services they offer, visit [www.gclearningservices.com](http://www.gclearningservices.com).
