

All-Natural Skin Care Line with Proven History Now Available for Private Label

National Blends Launches Private Label Program for its Acclaimed, All-Natural and Proven Effective Line of Skin Care Products.

January 5, 2010 (FPRC) -- National Blends LLC, a leading manufacturer of all-natural skin care and wellness products in North America (<http://www.NationalBlends.com>), today launched its private label program for its acclaimed proprietary skin care formulations. With a demonstrated history for successfully treating and clearing skin conditions like acne, eczema, rosacea, skin warts, wrinkles and crow's feet among others, this program is poised to quickly become the number one choice for skin care distributors seeking new products and all natural alternatives.

"There isn't a single product like it available today" says Marc Narine, Vice President of Marketing. "Rather than alter your body's chemistry by using chemicals, our proprietary formulations actually works with it, helping your body to do what it has been doing for thousands of years, more effectively".

Much of the common products used today contain petrochemicals, parabens, harsh soap and detergents, animal by-products, alcohols, and other known skin irritants. For any results to be had, they must be used continuously, sometimes with side effects and usually with the condition returning if the user ever discontinues. "As a result of all the toxins and pollutants in our environment today, the already present friendly bacteria and healthy organisms (the body's natural external defense system) have been weakened. Using completely natural ingredients, our products (http://nationalblends.com/PUR_Naturals.aspx) strengthen those healthy micro-organisms, helping your body to become more alkalized, balance its pH and begin skin repair and restoration at the cellular level".

Mr. Narine says the National Blends private label initiative (http://nationalblends.com/Private_Label.aspx) is the most attractive program for any distributor looking to expand its line of skin care products. "You now have access to a 100% all-natural product that is effective on any skin type of any color; that has zero side effects; that can be purchased at cost-effective prices which allow tremendous margin for profit; that has no known competitors and quite simply, that works!"

National Blends LLC is based in Orlando, FL and is a leading manufacturer of green/organic products for the individual and the environment. Their array of products include PÙR Naturals, the house brand for their life changing skin care solutions; Activ Naturals, their line of all-natural dietary supplements; the Spark, a highly effective selection of sexual enhancement products for men and women, and Just Natural, a unique line of green cleaning products for the household.
