

27 New Honeywell Programmable Thermostats from DtiCorp.com

You can save as much as 33% a year on your heating and cooling bills using programmable thermostats.

January 8, 2010 (FPRC) -- Fort Lauderdale, FL - Popular Honeywell online retailer DtiCorp.com (<http://www.DtiCorp.com>) is introducing 27 New Honeywell Programmable Thermostats. Using a programmable thermostat, you can adjust the times you turn on the heating or air-conditioning according to a preset schedule. As a result, the equipment doesn't operate as much when you are asleep or when the house, or a part of it, is not occupied. Programmable thermostats can store and repeat multiple daily settings (six or more temperature settings a day) that you can manually override without affecting the rest of the daily or weekly program.

Honeywell Programmable Thermostats provide the ability to automatically adjust for unique lifestyles, controlling home comfort to the desired temperature at the desired time. They do the work for the homeowner automatically when they are away or asleep. And the big benefit is energy savings - up to 33% on home heating and cooling costs - by adjusting the temperature up or down, thereby reducing equipment run-time. Honeywell combines the convenience of schedule selection with precise temperature control to deliver superior programmable thermostats.

Models available:

A. Honeywell Prestige Comfort Systems. Prestige Comfort System is the easiest-to-use programmable thermostat line available. Features include: 7 Day Programming wizard, Multi-Language Options and USB setup. Prestige is RedLINK enabled and can be used with compatible wireless accessories.

1. THX9321R5000
