

## **New SEO 2.0 Pages Launched by NetBiz: “How To Stand Out While Blending In”**

*The new NetBiz.com Search Engine Optimization (SEO) 2.0 web pages offer affordable plans that can powerfully boost a company’s Search Engine Rankings, Traffic, Indexing, Branding, Click-Throughs, and Sales Conversions.*

January 23, 2010 (FPRC) -- NetBiz, one of the world’s largest and most successful Search Engine Marketing companies, now offers innovative Search Engine Optimization (SEO) 2.0 consultant services via new web pages at <http://seo-search-engine-optimization.netbiz.com>

The new NetBiz.com Search Engine Optimization (SEO) 2.0 web pages offer affordable plans that can powerfully boost a company’s Search Engine Rankings, Traffic, Indexing, Branding, Click-Throughs, and Sales Conversions.

In May of 2007 Google launched its Universal Search system that forever changed the way websites would be ranked. No longer are meta tags and content peppered with keywords the golden road to the top of the results page.

With Google’s new system, many different digital mediums are evaluated and subsequently blended in the search results offered, including web pages, social media, images, videos, articles, news, blogs, and products.

Web masters and business owners alike realize that getting noticed on Google, Yahoo, and Bing now requires a well thought out Universal Search SEO strategy and regular evaluation, updates, and reinforcement. NetBiz Search Engine Optimization 2.0, also known as Universal Search Optimization, utilizes cutting edge, yet white hat, methods to optimize “all” of a company’s digital assets.

Some of the many SEO 2.0 programs offered at the new NetBiz web pages include: Web Page SEO (SEO), Local Search SEO (LSEO), Video SEO (VSEO), News SEO (NSEO), Article SEO (ASEO), Blog SEO (BSEO), Mobile Phone SEO (MSEO), Image SEO (ISEO), Product SEO (PSEO), Paid Advertising SEO (ADSEO).
