

Internet Video Magazine Picks the Best and Funniest Valentine's Day Internet Videos

Internet Video Magazine - the leading source for Internet and web video, today added dozens of new, funny and romantic videos about Love, Romance and Relationships and of course, Valentine's Day

January 29, 2010 (FPRC) -- Internet Video Magazine - the leading source for Internet and web video, today added dozens of new, funny and romantic videos about Love, Romance and Relationships and of course, Valentine's Day (<http://internetvideomag.com/Videos/valentines101.htm>).

'Valentine's Day is all about love and warmth and good feelings. Then again, it is also a good time to laugh as well,' says Mark Shapiro, editor in chief at Internet Video Magazine. 'We take a light hearted look at Valentines Day with many dozens of short, funny videos perfect for sharing with the one you love or maybe the one you would like to love.'

Internet Video Magazine's Valentines Day section contains links to many videos that directly address Valentine Day - the holiday. This includes professional music videos, parody commercials as well as amateur videos.

The Love, Relationships and Romance videos pages (http://internetvideomag.com/Videos/Romance_Relationships10001.htm) are very similar in tone and topics, but are not linked to a specific day or holiday. Together the two sections are perfect for those who need a light hearted laugh at love.

Internet Video Magazine always welcomes submissions and suggestions from visitors. If you have a great Valentine's Day or a Love & Romance video that you want to share with the world, send the link and a short description to editor AT internetvideomag.com.

More about Internet Video Magazine

Launched in 1999, Internet Video Magazine is the premier online resource for those who watch and make Internet Videos. In addition to thousands of great videos, we also feature hundreds of articles about how to shoot, edit, make and post Internet Video. Whether you make Internet video for fun or for business, we have articles and content for you. We also provide reviews of many of the latest Internet video and broadcast video software packages, hardware and books.
